Audio Labeling Game

Welcome to MajorMiner's audio labeling game. The goal of the game, besides just listening to music, is to label songs with original, yet relevant words and phrases that other players agree with. We're going to use your descriptions to teach our computers to recommend music that sounds like the music you already like.

The rules

- * You will be presented with one randomly selected 10-second music clip at a time.
- * Describe that clip with any word or phrase, we call them "tags".
- * If you're the first person to describe that clip with that tag, you'll get 2 points when the next person tags that clip with that tag.
- * If you're the second person to describe that clip with that tag, you'll get 1 point immediately.
- * If more than two people have already tagged that clip with that tag, you won't get any points, but you can try another tag.
- * Tag each clip as many times as you want, follow one of the "new clip" links to listen to a new one.

Tips

- * The color of your tags tells you how many points you've scored with them: 2 points, 1 point, no points yet (but could be 2), 0 points.
- * For more tips, check out the Frequently Asked Questions.

To get started, either login to an existing account or register for a new one.
